Non-GAAP Financial Measures

We present certain Non-GAAP financial measures in this press release, including constant currency, Non-GAAP SG&A expenses, Non-GAAP operating income and Non-GAAP diluted earnings (loss) per share, to provide information that may assist investors in understanding our financial results and assessing our prospects for future performance.

Consistent with SEC regulations, we have not provided a reconciliation of forward-looking Non-GAAP financial measures to the most directly comparable GAAP financial measures in reliance on the "unreasonable efforts" exception set forth in the applicable regulations, because there is substantial uncertainty associated with predicting any future adjustments that we may make to our GAAP financial measures in calculating our non-GAAP financial measures.

We believe these Non-GAAP financial measures are important indicators of our operating performance because they exclude items that are unrelated to, and may not be indicative of, our core operating results, such as charges relating to retail store closures, tax reform, organizational changes and other one-time or non-recurring amounts. In particular, we believe the exclusion of certain costs and one-time amounts allows for a more meaningful comparison of our results from period to period. Further, we report comparable DTC sales on a constant currency basis for DTC operations that were open throughout the current and prior reporting periods, and we adjust prior reporting periods to conform to current year accounting policies.

These Non-GAAP financial measures, as we calculate them, may not necessarily be comparable to similarly titled measures of other companies and may not be appropriate measures for comparing the performance of other companies relative to Deckers. For example, in order to calculate our constant currency information, we calculate the current period financial information using the foreign currency exchange rates that were in effect during the previous comparable period, excluding the effects of foreign currency exchange rate hedges and re-measurements in the condensed consolidated balance sheets. These Non-GAAP financial results are not intended to represent, and should not be considered to be more meaningful measures than, or alternatives to, measures of operating performance as determined in accordance with GAAP. To the extent we utilize such Non-GAAP financial measures in the future, we expect to calculate them using a consistent method from period to period. A reconciliation of each of the Non-GAAP financial measures to the most directly comparable GAAP measures has been provided under the heading "Reconciliation of GAAP Financial Measures to Non-GAAP Financial Measures" in the financial statement tables attached to this press release.
