Stock Repurchase Program

During the fourth quarter, the Company did not repurchase any shares of its common stock. As of March 31, 2020, the Company had \$160 million remaining under its stock repurchase authorizations. The Company has paused share repurchase activity for the time being, but retains the discretion to commence share repurchase activity in future periods.

Financial Outlook

Given the ongoing and fluid economic environment related to the COVID-19 pandemic, the Company will not be providing full year guidance for fiscal year 2021.

COVID-19 Update

The Company continues to modify and evolve its operations in response to the COVID-19 pandemic. The Company will continue to review expert agency guidelines, as well as information from health officials and local authorities, while assessing the appropriate scope of operations and allocation of resources necessary to navigate this dynamic and unprecedented environment.

Company Liquidity

As of March 31, 2020, the Company had a liquidity position of over \$1 billion dollars, which included \$649.4 million in cash and cash equivalents and \$469.5 million available under its existing revolving credit facilities.

As of fiscal year end, the Company did not have any outstanding borrowings under any of its existing revolving credit facilities.

Retail Stores

On March 17, 2020, the Company announced a temporary closure of its retail stores in North America and Europe. Subsequently, store locations in Japan were also temporarily closed. These temporary closures largely remain in effect across many locations at this point in time. Due to the extended closure for many of these store locations, the Company has furloughed a portion of its retail employees. As stores begin to reopen, they will do so with modified operations including enhanced health and safety protocols. Additionally, some stores that have recently reopened are operating at a limited capacity as they continue to adapt to new and evolving challenges related to COVID-19.

Supply Chain

The Company's distribution center in Moreno Valley, California, as well as other third-party distribution facilities that the Company leverages to service its operations, are currently in operation and supporting ongoing logistics. However, these facilities may continue to operate at limited capacity, due to the enhanced health and safety measures now in place.

The Company maintains a network of strategic sourcing partners which includes material vendors and production factories. The Company experienced certain disruptions to sourcing with its third-party manufacturers during the fourth quarter of fiscal year 2020. While these disruptions have since been mitigated, it is possible that there will be disruptions in the future.

Operating Expense Plans

To mitigate the adverse impact the COVID-19 pandemic may have on its business and operations, the Company has reduced planned levels of operating expense for the upcoming fiscal year and has implemented a number of temporary measures to reduce operating expense, including restricting employee travel, suspending hiring of certain non-essential employees, suspending annual salary increases, canceling or postponing certain events, converting in-person meetings to virtual platforms, eliminating or deferring other discretionary expenditures, and in certain cases seeking payment accommodations or deferrals.

Non-GAAP Financial Measures

The Company presents certain Non-GAAP financial measures for the prior year in this press release, including constant currency, Non-GAAP SG&A expenses, Non-GAAP operating income (loss), Non-GAAP income tax expense (benefit) and Non-GAAP diluted earnings (basic loss) per share, to provide information that may assist investors in understanding its financial results and assessing its prospects for future performance.

The Company believes these Non-GAAP financial measures are important indicators of its operating performance because they exclude items that are unrelated to, and may not be indicative of, its core operating results, such as charges relating to restructuring costs, organizational changes, legal matters and other one-time or non-recurring amounts. In particular, the Company believes the exclusion of certain costs and one-time amounts allows for a more meaningful comparison of results from period to period. Further, the Company reports comparable DTC sales on a constant currency basis for DTC operations that were open throughout the current and prior reporting periods, and may adjust prior reporting periods to conform to current year accounting policies.

These Non-GAAP financial measures may not necessarily be comparable to similarly titled measures of other companies and may not be appropriate measures for comparing the performance of other companies relative to Deckers. For example, in order to calculate constant currency information, the Company calculates the current period financial information using the foreign currency exchange rates that were in effect during the previous comparable period, excluding the effects of foreign currency exchange rate hedges and re-measurements in the condensed consolidated balance sheets. These Non-GAAP financial measures are not intended to represent, and should not be considered to be more meaningful measures than, or alternatives to, measures of operating performance as determined in accordance with GAAP. To the extent the Company utilizes such Non-GAAP financial measures in the future, it expects to calculate them using a consistent method from period to period. A reconciliation of each of the GAAP financial measures to the most directly comparable Non-GAAP financial measures has been provided under the heading "Reconciliation of GAAP Financial Measures to Non-GAAP Financial Measures" in the financial statement tables attached to this press release.
